SUMMARY

Software Engineer with project management skill set; able to dissect complex problems and return efficient solutions. Experience leading teams to create, oversee, and complete initiatives using industry-standard methodologies. Looking forward to applying my experiences in a meaningful organization that is focused on community development.

EXPERIENCE

100Devs, Los Angeles, CA — *Software Engineer*

JANUARY 2022 - PRESENT

- Collaborate with a team of developers to build modern and responsive web applications using best practices.
- Build semantically structured full stack web applications.
- Apply project management methodologies in team-based settings.

Edina Public Schools, Edina, MN — *IT Project Manager*

AUGUST 2014 - PRESENT

- Responsible for management of technology initiatives: vendor management, expansion of service areas, data analysis.
- Lead the implementation of district-wide technology policies: lifecycle management, standardization of professional development, liaison with internal and external stakeholders for continual service improvement.
- Manage technology service staff and student internship programming.
- Organize, update, and present information regarding the organization's technology ecosystem.
